## Oracle E-Business Suite Implementation

The University is a comprehensive urban University and medical center encompassing around 80 city blocks, and has a student enrollment of more than 15,000. The university is home to a large graduate school, a world renowned health care complex with more than 70 research centers focusing on such diverse issues as AIDS, bio-defense and emerging infections. As the second largest employer in the state, the university generates more than 50,000 full-time equivalent jobs both within the University and the community.

## High-Level Project Goals Achieved

- ❖ Implemented Oracle HR, ACT (Employee Activation, Change and Termination), Time & Labor, Labor Distribution, Effort Reporting and Finance (GA, GL, AP, AR and Purchasing)
- ❖ Deliver an accessible and flexible technical environment that empowers end-users and developers to manage change quickly and efficiently.
- ❖ Enable accurate, fast, efficient tracking and reporting of administrative activities.
- ❖ Eliminate redundant entry of information and to minimize the need for generation of paper.
- ❖ Support straight-forward querying and reporting to eliminate voluminous paper reports.
- ❖ Provide access to data and to flexible report formats that reduce the need for departmental 'shadow' systems.
- ❖ Follow accepted standards for data storage and retrieval so that unanticipated needs can be addressed in the future without extensive customization and reprogramming.
- ❖ Promote rather than hamper the ability of the enterprise to examine its business practices and make change in processes when necessary.
